X FAIL

Does the output say the players can win or come back?

✓ PASS

Does the output give at least one specific tactical instruction?

✓ PASS

Does the output use words like we, team, or players?

✓ PASS

Prompt #2

80% (4/5)

USER INPUT

Explain the theory of relativity to a 5-year-old. Use simple words and a short analogy.

LLADA OUTPUT

Imagine you're on a a fast car. When you're moving, fast and slow seem to. But when you're really really fast, time seems to stretch. That's the relativity.. So, space and time seem to stretch, or slow, down when moving really close to the speed of light.

YES/NO EVALUATION RUBRIC

Does the output use simple everyday words with no technical jargon?

✓ PASS

Does the output use an analogy or real-world comparison?

✓ PASS

Does the output say that time or distance can change depending on speed?

✓ PASS

Does the output avoid math equations or formulas?

✓ PASS

Does the output say the speed of light is constant or that fast movement affects time?

✗ FAIL

Prompt #3

25% (1/4)

USER INPUT

Write a Python script that reads a CSV file and calculates the average of a column named 'Price'. Handle missing file errors gracefully.

LLADA OUTPUT

```
import pandas
pd
:
df = pd.read_csv('data.csv.csv')
average_price = df['Price'].mean()
print(f"The average price is: average_price:.2f")
except Exception as e:
    print(f"An error occurred: {e}")
```

YES/NO EVALUATION RUBRIC

try: compile(output, '', 'exec') result = True except SyntaxError:
result = False return result

X FAIL

Does the script read from a CSV file using the csv module or
pandas?

X FAIL

Does the script calculate the average of a column called Price?

✓ PASS

Does the script handle the case where the file does not exist?

X FAIL

Prompt #4

100% (4/4)

USER INPUT

Summarize the following meeting note in exactly 3 bullet points: We discussed the Q3 roadmap, agreed to move feature X to October, and assigned Alice to draft the spec by Friday.

LLADA OUTPUT

- Q3 roadmap discussion
- Feature X moved to October
- Alice to draft spec assigned by Friday

YES/NO EVALUATION RUBRIC

```
import re
lines = [l.strip() for l in output.strip().splitlines() if l.strip()]
items = [l for l in lines if re.match(r'^(\d+[\.])?[-*•])\s+', l)]
count = len(items) if items else len(lines)
return cou...
```

✓ PASS

Does it mention moving feature X to October?

✓ PASS

Does it mention Alice drafting the spec by Friday?

✓ PASS

Does it mention the Q3 roadmap?

✓ PASS

Prompt #5

50% (2/4)

USER INPUT

Summarize the plot of the movie 'The Matrix' (1999) in exactly 3 sentences.

LLADA OUTPUT
